## TSUGA · Hemlock

We still have a magnificent stock of Hemlocks, notwithstanding the fact that it is our largest selling evergreen. In addition to sizes listed, we have large specimens from 20 to 35 feet in height which are the admiration of all who see them.

Hemlocks can be used in many different ways: As lawn specimens they attain great size and beauty; by shearing they may be used in foundation planting and kept from overgrowing for years and years; for border or screen they form a most naturalistic background. Hemlocks thrive in shade or full sun and are practically immune to insects and diseases.

# Flowering Shrubs

### ROSEDALE HALVES PRICES on 1,800 LARGE EVERGREENS

Firs - Spruces - Pines - Hemlocks - Junipers - Cypresses

Dear Customer:

You know the Rosedale reputation for quality. The Trees we offer in this August - September Sale are among the choicest in our Nurseries . . . well-balanced, symmetrical specimens with heavy root systems and thick, bushy tops.

How does it happen that Rosedale slashes prices on fine stock at the very time when Price Administrator Henderson warns Congress that we face inflation, when our own costs are rising sharply, and other Nurserymen are revising their prices UPWARD?

The explanation is simple. Space is limited and valuable at ROSEDALE. Right now, we must make room for new plantings. The Trees we have marked MUST be sold quickly.

This is your opportunity to have the kind of trees you have admired at prices which represent tremendous savings. By next Spring, you would pay about three times the amounts we are now asking for the same sizes and quality.

Examine the enclosed Price List carefully. This is our regular 1941 Price List, and the prices printed in black have been our regular selling prices. The prices surprinted in red are the special Sale Prices at which you can now purchase the same stock. You can realize the wonderful values offered.

If possible, come to the Nurseries and make your selections in person. We will dig the Trees to your order, ball and burlap them securely, and deliver to any address within 20 miles of our Nurseries. Arrangements can be made for transporting Rosedale Trees to more distant points and at reasonable cost.

Remember, there are only a limited number of trees in each size and variety. Prompt action is imperative.

Very truly yours,

*H. C. Taylor*
